Building My First-Ever Personal Website

By Kennedy Ezumah for CS5610

Technologies and Frameworks Used

- Text-Editor: Sublime Text with ESLint,

  Prettier, and Babel

- Server: Reload with Node

- HTML/CSS/JavaScript

- Bootstrap Framework to enable

  responsiveness of website

1. Objectives

1. Create a digital home for my personal brand and share my interests, projects, and hobbies
2. Gain first-hand experience building a responsive website using HTML/CSS/JavaScript

Most Exciting Accomplishment :

Understanding how all these components fit together to get a working site online

–

Biggest Challenges:

- Approaching this project with 0 web-dev experience
- Having to quickly understand the relationship between servers, clients and ports and how data are exchanged on the internet
